

Digital Watchdog is MegaLab® Certified

Tampa, FL May 12, 2014– Digital Watchdog, a security and surveillance solutions leader, is proud to announce that it has strengthened its existing relationship with megapixel technology leader Arecont Vision by participating in their MegaLab Certification.

Since 1987, Digital Watchdog has become a leading manufacturer of powerful security solutions throughout the world. Its recent transition into the IP and megapixel market has demonstrated Digital Watchdog's capabilities to transform their popular and award winning support and quality from analog to the advanced and widespread IP, megapixel, and high resolution world.

Arecont Vision's MegaLab is a dedicated test environment located in the engineering wing of Arecont Vision's headquarters in Los Angeles, CA. The MegaLab ensures the highest level of integration between Arecont Vision's megapixel cameras and the industry's leading video management applications. The MegaLab, as part of Arecont's Technology Partner Program, was created to support the highest level of integration with the industry's top VMS platforms, ensuring that customers feel confident in picking a proven and certified solution.

The MegaLab Certification makes Digital Watchdog's DW Spectrum IPVMS and Blackjack NVRs fully and natively integrated with all Arecont cameras. The DW Spectrum IPVMS is a state-of-the-art IP Video Management Software built as the most robust surveillance software yet the most user-friendly on the market. The robust software includes powerful features such as thumbnail, smart motion, and Forensic Spyglass search capabilities, as well as quick installation and instant network mapping. The software powers paramount Blackjack servers with flexible architecture to match any and all project sizes with headless Linux servers, to local display Windows servers, to mega PC-based servers perfect for high-end and large scale installations.

"The Arecont MegaLab integration allows Digital Watchdog to reinforce its foothold on the IP market by certifying the DW Spectrum IPVMS as one of the industry's leading software platforms, completely tested and MegaLab certified" says Wade Thomas, President of Digital Watchdog. "Arecont has some of the best megapixel cameras in the market, and they have built good products. Offering our joint clients the ability to enjoy the best our software and their cameras has to offer is what we set to do."

About Digital Watchdog

Digital Watchdog, a leading manufacturer of security and surveillance solutions, offers stunning image quality, advanced hardware capabilities, reliable customer support and lowest total cost of deployment to the Megapixel IP surveillance market. With facilities in both Tampa, FL and Cerritos, CA, Digital Watchdog is committed to delivering powerful security solutions to its customers worldwide.
